

# Femap subscription

## FEA that fits your business needs

Siemens PLM Software's Femap™ system is a part of the Simcenter portfolio and facilitates an advanced engineering mesh-centric analysis environment. CAD independent and solver-neutral technology with cost-effective functionality have enabled Femap to become the world's most popular engineering analysis environment. It is widely used by the world's leading engineering organizations and consultants to model complex products, systems and processes, including satellites, aircraft, defense, electronics, heavy construction equipment, lift cranes, marine vessels and process equipment.

Femap is available by subscription on a monthly or annual basis. Select the product configuration that best suits your business needs, ranging from Femap standalone to the bundled Femap with NX™ Nastran® with advanced analysis options. Use the table below as a guide to choosing the package that best fulfills your functionality requirements. Then visit [www.siemens.com/plm/buy-femap](http://www.siemens.com/plm/buy-femap) to start your subscription today.
